FAQs

What is the difference between a Videographer and a Cinematographer?

The honest truth? Nothing! They provide the exact same thing - coverage of your wedding day. Both are artistic, creative, and unique at what they do and truly enjoy capturing your memories on film.

How do we reserve our date?

Once we get the okay from you, we reserve the date as yours immediately and get the necessary paperwork in the mail. From the time you receive it, you have two weeks to complete the form and send it back to us with your deposit, which is 50% of the contract amount. Once that happens, you are good to go!

My uncle has a camcorder - why do we need professional videography?

Key word - *professional!* Why not let your uncle sit back and enjoy the wedding day? We have amazing audio capability to capture your every word and our experience lets us get all the best footage without intruding on the most important parts.

You've never worked with our photographer before - is that a problem?

Not at all. We love meeting new professionals on wedding days and we always do our best to work together so we can both provide you with the highest quality possible. Communication is key and we will never get in the way of your photographer!

Can I pay with a credit card?

Of course! Visa, Mastercard or Discover. Whatever is easiest for you!

I've never had to hire a Videographer before. What should I look for in a one?

The work should speak for itself. Find a company that has a style and feel that you love, so you know you will be happy with the final product. Also, get to know them as a person - next to the photographer, they will be spending the entire day with you!

When can we expect our final product?

Our turnaround time can vary. Typically it takes 6-8 weeks for the full edits to be completed. However, if you need it done sooner for your reception back home, please let us know and we will do our best to accommodate!

How far do you travel?

Your location is your choice and no matter where you decide to get married, we can be there! Contact us today for a quote if you are looking outside of the Emerald Coast.

We are interested in a Same Day Edit. Do we have to provide a screen/projector to play it?

Our Same Day Edit package doesn't currently include a screen or projector. We do have resources available to you to rent them, or check with your venue as they may also have them available.

How are you different than other companies?

Besides all the other reasons we've already mentioned, our passion will show. We truly love weddings and love what we do. Nothing makes us happier than knowing we are providing a keepsake of precious memories from the happiest day of your life!
